

EXAM II STUDY GUIDE

ALGEBRA AND TRIGONOMETRY

(MATH 1450-02), FALL 2019

LOCATION: CR 103

Date: Thursday, October 24, 2019 from 5:00 PM - 7:00 PM

SCOPE OF THE EXAM

The exam will consist of problems concerning the material from the following sections:

Sections Covered

4.1-4.6, 5.1-5.4, 6.1

Section 4.4 will, largely speaking, be excluded and is not the primary focus of the exam. As such, you may find it beneficial to focus primarily on studying material from the other sections listed above, whose content will be reflected most significantly in the problems asked on this exam.

SELECTED EXERCISES FROM REVIEW ASSIGNMENTS

The Chapter 4, Chapter 5, and Chapter 6 review assignments on XYZHomework are an excellent study resource for this exam. In particular, you may find it helpful to review the following problems and their solutions:

Chapter 4 Review :5, 6, 7, 11, 14, 15

Chapter 5 Review :1, 3, 4, 5, 6, 8, 11, 18, 20

Chapter 6 Review :1, 2, 4, 6, 9, 10

SELECTED EXERCISES FROM THE TEXTBOOK

The following exercises from the textbook may also be a useful resource in preparing for the exam:

Section 4.1 : 44 – 50

Section 4.2 : 43 – 45

Section 4.3 : 6 – 35

Section 4.4 : (None)

Section 4.5 : 3 – 24, 27 – 29

Section 4.6 : 4 – 30, 36 – 50

Section 5.1 : 22 – 39, 50 – 57

Section 5.2 : 10 – 22

Section 5.3 : 6 – 37, 43 – 51

Section 5.4 : 10 – 16, 29 – 31, 52 – 56

Section 6.1 : 6 – 22, 31 – 34, 38, 39, 42, 48

You certainly do not *need* to do all of the above problems to be adequately prepared for the exam (there are far too many problems here for that). Instead, it is recommended that you just look over some of the problems on this list from sections you feel less confident about and practice by attempting whatever ones seem challenging to you.

Except (potentially) in extra credit problems, no material from section 6.2 or section 6.3 will appear on the exam.
