

EXAM IV STUDY GUIDE

ALGEBRA AND TRIGONOMETRY

(MATH 1450-02), FALL 2019

LOCATION: AG AUDITORIUM

Date: Tuesday, December 17, 2019 from 3:30 PM - 5:30 PM

SCOPE OF THE EXAM

The exam will consist of problems concerning the material from the following sections:

Sections Covered
10.1-10.4, 11.1-11.4

Except (potentially) in bonus questions, Chapter 12 will be excluded from this exam. As such, you may find it beneficial to focus primarily on studying material from the other sections listed above, whose content will be reflected most significantly in the problems asked on this exam.

SELECTED EXERCISES FROM REVIEW ASSIGNMENTS

The Chapter 10 and Chapter 11 review assignments on XYZHomework are an excellent study resource for this exam. In particular, you may find it helpful to review the following problems and their solutions:

Chapter 10 Review :1, 5, 9, 13, 14
Chapter 11 Review :2, 4, 5, 6, 7, 8, 9

SELECTED EXERCISES FROM THE TEXTBOOK

The following exercises from the textbook may also be a useful resource in preparing for the exam:

Section 10.1 : 11 – 25	Section 11.1 : 6 – 15, 21 – 38
Section 10.2 : 11 – 25	Section 11.2 : 6 – 13, 24 – 52
Section 10.3 : 11 – 30	Section 11.3 : 6 – 17, 20 – 43
Section 10.4 : 6 – 17	Section 11.4 : 10 – 21, 34 – 44

You certainly do not *need* to do all of the above problems to be adequately prepared for the exam (there are far too many problems here for that). Instead, it is recommended that you just look over some of the types of problems on this list from sections you feel less confident about and practice by attempting a few that seem challenging to you.
