

Calculus II (MATH 2205)
Fall 2017

Name (Print): _____

Quiz 8: Section 8.5, 8.6

Score: _____ / 10

Section 8.5

1. 5 points Use the Ratio Test to determine whether the following series converges:

$$\sum_{k=1}^{\infty} \frac{k^2}{4^k}$$

Section 8.6

2. 5 points Determine the radius of convergence of the following power series. Then test the endpoints to determine the interval of convergence.

$$\sum_{k=0}^{\infty} \frac{(-1)^k}{2k+1}.$$
