

Quiz 3

Problem Solving, Math 1000 – Summer 2016

Tuesday, June 7

The following quiz is out of 30 points, and will count towards your quiz grade. Each problem is worth exactly 10 points. Answer the following problems (you may use your notes).

Problem 1 *Give the formula for the N th Fibonacci number in terms of previous Fibonacci numbers and write the first eight numbers in the Fibonacci sequence.*

Problem 2 *State the golden property and write the exact value of the golden ratio (not a decimal approximation of it).*

Problem 3 *Using your answer from 2, write the exact value of ϕ^2 (not a decimal approximation of it).*
