

Written Homework Guidelines

Problem Solving, Math 1000

Summer 2016

- Your work and answers must be done on at least two separate pages from your assignment sheet.
- Your answers and work must be stapled to your assignment sheet when submitted, and the first page must be the assignment sheet.
- Your first and last name must be written clearly in the top, right-hand corner of the assignment sheet.
- Do not mark the assignment sheet other than to write your name.
- Your work and answers must be done in pen (black or blue ink is acceptable, **no** red ink).
- Your work and answers must be submitted on unlined, white paper (i.e. standard printer paper).
- You must submit your work along with your answers, with the first such page labeled "Work" at the top center of the page. This includes mistakes and incorrect attempts. Mistakes must not be "scratched" or "scribbled" out. All mistakes must be crossed out with a single line.
- Your answers must be written neatly and without mistakes (small mistakes and transcription errors do not count) on a separate sheet labeled "Solutions" at the top center of the page.
- On both your work and answers, each question must be clearly numbered.
- Your assignment must be submitted with the three sections "Assignment Sheet", "Solutions", and "Work" stapled together in that order.
